

Determining Your Software Version VarioPrint i-series Inkjet Press

The following procedure will help you determine the press software so the correct media profile is downloaded. The 2 options available are Media Catalogs and Media Packs. Downloading the incorrect version will not work on the press.

Step 1

Navigate to the VarioPrint i-series control panel.

Step 2

At the bottom of the screen, select System.

Step 3

On the left-hand side of the screen, select Setup.

Step 4

On the Setup screen, under Advanced, select System Configuration.

Step 5

On the System Configuration pop-up, select the drop-down arrow next to About and you will see the version of your printer software.

- If your software version is 2.1.x or lower, your press will utilize **Media Catalogs**.
- If your software version is 2.2.x or higher, your press will utilize **Media Packs**.
